CARBOHYDRATE RESEARCH

Contents

Regular Papers

Conformational analysis of asperlin by NMR spectroscopy and molecular modeling
E. Mikros (Athens, Greece), P. Dais (Iraklion, Greece) and F. Sauriol (Montreal, Canada) 1

^{1}H and ^{13}C NMR spectral assignments of the major sequences of twelve systematically modified heparin derivatives
E.A. Yates, F. Santini, M. Guerrini, A. Naggi, G. Torri and B. Casu (Milan, Italy) 15

Synthesis of allosamidin analogues
R. Blattner, R.H. Furneaux and G.P. Lynch (Lower Hutt, New Zealand) 29

An HPLC method for the quantitative determination of hexeneuronic acid groups in chemical pulps
G. Gellerstedt and J. Li (Stockholm, Sweden). 41

First synthesis of cellooctaose by a convergent synthetic method
T. Nishimura and F. Nakatsubo (Kyoto, Japan) 53

Synthesis and application of α-D-mannosyl clusters as photoaffinity ligands for mannose-binding proteins: Concanavalin A as a model receptor
J. Lehmann and U.P. Weitzel (Freiburg, Germany) 65

Synthesis and characterization of a carbene-generating biotinylated *N*-acetylglucosamine for photoaffinity labeling of β-(1 → 4)-galactosyltransferase
Y. Hatanaka, M. Hashimoto (Toyama, Japan), S. Nishihara, H. Narimatsu (Tokyo, Japan) and Y. Kanaoka (Toyama, Japan) 95

Structure of the O20 antigen of *Stenotrophomonas* (*Xanthomonas* or *Pseudomonas*) *maltophilia*
A.M. Winn and S.G. Wilkinson (Hull, UK) 109
